USB2Show US165 User Manual

The USB 2.0 to DVI Adapter enables you to connect any monitor, LCD or projector to your PC or notebook. By using the included adapter DVI to VGA and DVI to HDMI, you can also connect VGA and HDMI monitors. In order to connect several monitors, etc. to a PC, you simply need an additional adapter for each display. You can connect up to 6 adapters to one PC. The USB 2.0 Adapter can mirror and extend the display. If you use this external USB 2.0 technology, you do not need an additional VGA card.

Feature List

Now you can add another VGA adapter by an external USB device.

The extra monitor can be configured to either mirror or extension Screen.

The USB to DVI/VGA adapter supports all analogue displays with a DVI connector. VGA display can also be connected using a suitable DVI to VGA converter.

You can connect up to 6 pieces The USB to DVI/VGA adapters to one PC at same time, and each one can be different contents.
