

4K HDMI Dongle

ATV195X

ATV195X as a 4K Dongle, using Android 6.0 operating system, can plug and play on HDMI interface TV, simple and light to use, suitable for hidden placement, Mainly used for home video and audio.

Easy to use, small size

- Direct plug HDMI Out male head, plug and play;

Excellent heat dissipation performance

- Built-in double-sided honeycomb fan heat hole design, and the metal shell in line with the thermodynamic principle, more conducive to fan heat

Multiple networking methods

- In addition to WiFi networking, it can also be connected with an external USB to Ethernet adapter, plug in the network cable can be normal Internet access

Strong performance

- Super fast speed, high reliability, low energy consumption (power consumption is only 0.2W when standby)

Dual-band wifi

- At present, there are more devices in 2.4G frequency band, and the environmental interference is greater. 5G channels are cleaner and faster, and 5G saves more power when transmitting the same amount of data. Therefore, dual-band WiFi gives users more choices and better experience

Support personalized customization

- Hardware configuration is optional, provide SDK secondary development, MDM customization, APP customization

Product Specification

CPU	Quad Core ARM Cortex-A53 CPU up to @ 2.0GHz
GPU	Mali 450 GPU @ 750MHz
Internal Memory	2G DDR4(Optional 1G DDR4)
Internal Storage	8G EMMC
OS	Android 6.0
DOLBY	Optional
USB	USB2.0 x 1
Micro USB	Micro USBx 1
HDMI	V2.0
MicroSD Slot	Max: 32G
DC Input	5.0V-2A
Video Output	HDMI
Audio Output	HDMI
LAN	USB to Ethernet Adapter(Optional)
WiFi	IEEE 802.11 b/g/n AC 2.4G 5.8G (Optional)
BT	4.0 (Optional)
Remote Controller	BT /USB wireless remote control
Size	80x36x13mm
Net Weight	40g
Power Adapter	AC100 ~ 240V 50/60Hz
