EyeTV Duo

EyeTV Netstream Duo is a network Dual TV tuner for digital/cable television live on home network for all the Macs, PCs and iPads. EyeTV Netstream Duo connects broadcast TV to your router via Ethernet and stream digital/cable television to two of your computers, tablets and smartphones. With a rooftop antenna, the computers can pick-up weaker signal and watch TV wirelessly in a Wi-Fi network. Thanks to automatic hardware transcoding, EyeTV Netstream Duo brings unencrypted HD channels directly to your tablet or smartphone – without overloading your home network or mobile device. It also includes the award-winning EyeTV3 software for your Mac as well as the TotalPlayer for Windows.

FEATURES:

- Real time on the fly converts live TV to more efficient stream format also better playback support on portable devices, especially when the Wi-Fi bandwidth is limited
- EyeTV Netstream Duo makes digital/cable TV simply part of the home network
- Watch Digital / Cable TV on every tablet, smartphone ,Mac and PCat home
- Stream two TV channels to up to two devices.
- Enjoy digital/cable TV in the garden with no cabling required
- Watch, pause, and record TV on your devices with software enhencement
- Easy setup with iPad, iPhone or Android
- HDchannels also available on tablets and smartphones with hardware transcoding
