

DTV Netstream Air

ATSC Network Tuner with Hardware Transcoding

DTV netstream Air

DTV netstream Air is a network TV tuner for digital/cable television live on home network for all the Android Smart Devices and iPads. DTV netstream Air connects broadcast TV to your router via Ethernet and stream digital/cable television to your computers, tablets and smartphones. With a rooftop antenna, the computers can pick-up weaker signal and watch TV wirelessly in a Wi-Fi network.

Thanks to automatic hardware transcoding, DTV netstream Air brings unencrypted HD channels directly to your tablet or smartphone – without overloading your home network or mobile device.

FEATURES:

- Real time on the fly converts live TV to more efficient stream format also better playback support on portable devices, especially when the Wi-Fi bandwidth is limited
- DTV netstream Air makes digital/cable TV simply part of the home network
- Watch Digital / Cable TV on every tablet, smartphone and iphone,ipads at home
- Enjoy digital/cable TV in the garden with no cabling required
- Watch, pause, and record TV on your devices with software enhancement
- Easy setup with iPad, iPhone or Android
- HD channels also available on tablets and smartphones with hardware transcoding
