Upgrade Steps:

1. Unzip the Driver file DriverAssitant_v4.5.zip on your PC, and run DriverInstall.exe ;
2. Unzip AndroidTool_v2.71_burn_tool.zip on your PC, open the config.ini file and modify the value of Selected to 2 :

3. Run AndroidTool.exe under the "AndroidTool_Release_v2.71" folder, and select firmware:

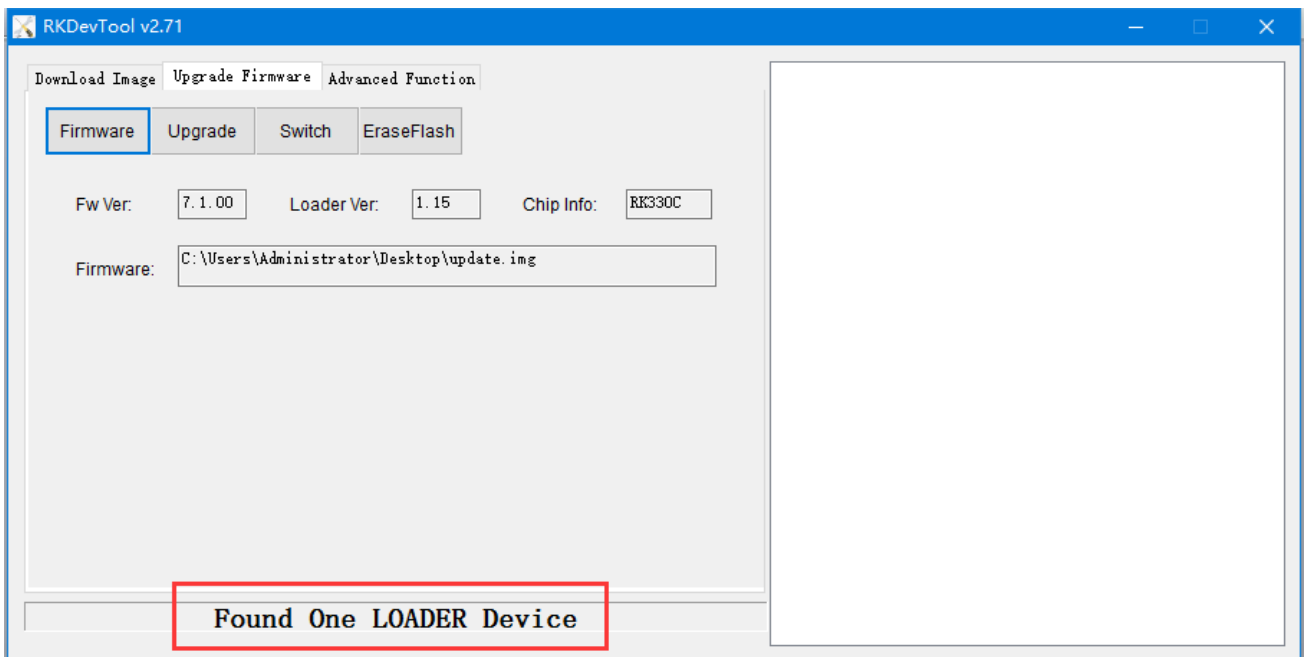

4. Do not plug in power, press and hold the update button, connect your PC and the box through the Type-C data cable, then plug-in power-adaptor, (then turn on the power switch if the box has it), hold the button for 5-10 seconds until appear "Found One LOADER Device" in the tool, see the pictures below:

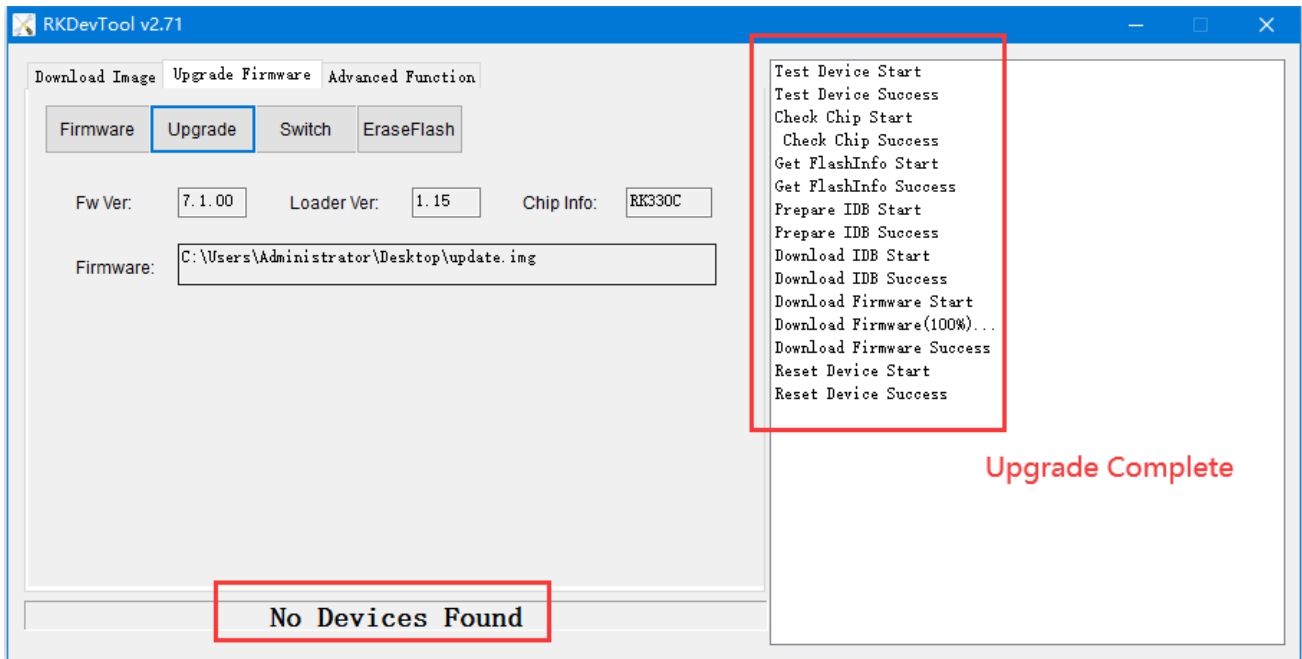

usb cable

4. Click "Upgrade" and the upgrade details will be displayed on the right, when the upgrade is complete, the box will restart automatically:

Q & A:

Q: Can not connect to the PC via USB cable?

A:1.Please confirm whether it is a USB data cable, not a charging cable.

2.Please can't plug in power first, press and hold the update button first, connect your PC and the box through the USB data cable, then plug-in power-adapter, (then turn on the power switch if the box has it), hold the button for 5-10 seconds;

3.If none of the above works, please change a PC,or USB cable,or change a USB port on PC;

Q: Appear "Found One MASKROM Device" in the tool,not "Found One LOADER Device" ?

A: Please click the EraseFlash option, waiting for completion, and then click "Upgrade" option...

Q: The update fail details has displayed on the right,not device Success?

A:1.Please try to download the firmware again,or check the MD5 value of the firmware with the provider;

2.Please change a type-C cable to retry,or change the USB port on the PC,preferably USB3.0,or change a PC to retry.
